

2015 Wilderness Trip Planner

This guide is intended to help with planning an overnight wilderness trip, and to help with understanding and supporting the mission of the National Park Service:

“...to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations.”

-The National Park Service Organic Act

It is with this idea of preservation for future generations that we ask you to review and follow the guidelines and restrictions in this document.

“The mountains are calling and I must go” – John Muir

Wilderness with a Capital "W"

In 1964, with the passage of the Wilderness Act, Congress established the National Wilderness Preservation System to protect some of the nation's most wild, natural and undisturbed landscapes. As defined by the Act, "wilderness, in contrast with those areas where man and his own works dominate the landscape, is hereby recognized as an area where the earth and its community of life are untrammelled by man, where man himself is a visitor who does not remain." There are now more than 750 designated wilderness areas in nearly every state and Puerto Rico.

Sequoia and Kings Canyon Wilderness Today

In 1984, the California Wilderness Act designated over 85% of Sequoia and Kings Canyon National Parks as the Sequoia-Kings Canyon Wilderness. This gave 722,983 acres the nation's highest legal protection from development or abuse. Congress designated an additional area, the 39,967 acre John Krebs Wilderness, and added 45,129 acres to the Sequoia-Kings Canyon Wilderness with passage of the *Omnibus Public Land Management Act of 2009*. Today, 808,078 acres or 93.3% of Sequoia and Kings Canyon National Parks is designated wilderness, and another 30,000 acres (3.5%) of lands in the parks are managed as wilderness per National Park Service policy.

Almost completely surrounded by US Forest Service-managed wildernesses, the wilderness units of Sequoia and Kings Canyon National Parks are part of the second largest contiguous wilderness complex in the lower 49 states.

Celebrate. Timeless. Memories.

Join us this year as we celebrate the 125th anniversary of Sequoia National Park and the 75th anniversary of Kings Canyon National Park. Find out about anniversary events and programs happening throughout 2015.

Join us at: <http://www.nps.gov/features/seki/2015/>

2016 National Park Centennial

The National Park Service turns 100 on August 25, 2016, and everyone can take part in the celebration!

The centennial will kick off a second century of stewardship of America's national parks and engaging communities through recreation, conservation, and historic preservation programs. We invite you to find your park and discover the national parks and programs in your own backyard!

Join us at: <http://www.nps.gov/subjects/centennial/index.htm>

2015 Minimum Impact Restrictions Terms and Conditions of Wilderness Permit

GENERAL TRAVEL REQUIREMENTS

- **Wilderness permits are required for all overnight travel.**
- **A signed permit must be in the permittee's possession and must be presented to an authorized person upon request.**
- To prevent erosion and preserve vegetation, do not short-cut trails.
- Do not build rock cairns or other trail markers.
- Pets are not allowed in the wilderness.
- Pack out all trash, including toilet paper.
- All wheeled vehicles and all motorized equipment are prohibited in wilderness per the Wilderness Act of 1964.
- Discharge of any firearm or weapon is prohibited. Possession of weapons, including bear spray, is prohibited. Possession of firearms is subject to state regulations

PARTY SIZE LIMITS

- Maximum party size is 15 people and 20 head of stock, except in Redwood Canyon (where group size is limited to 10 people).
- Party size is limited to 8 individuals (people and stock combined) when traveling off trail in the following areas: Lamarck Col; Darwin Canyon and Darwin Bench; Dusy and Palisade Basin; Sixty Lake and Gardiner Basin; Sphinx Creek and Lakes; Mt. Brewer Range; South of Mt. Whitney-Crabtree Lakes; Miter Basin; Mt. Langley; and Army Pass.
- Affiliated groups may not travel or camp within ½ mile of each other if the total group size exceeds the limits described above.

CAMPSITE SELECTION

- No camping within 25ft. of water. From 25 to 100ft. from water, please camp only in previously well-established campsites.
- Camp on durable surfaces (rock, sand, dirt, snow, etc.) or in designated campsites. Do not camp on vegetation or in meadows.
- Do not construct rock walls, trenches, new fire rings (or add rocks to existing fire rings), bough beds, camp furniture, etc.
- Do not camp within 2 miles of trailheads, except in Redwood Canyon (where camping is not permitted within 1 mile of trailhead).

Area Specific Camping Restrictions:

Lakes Trail -No camping at Aster Lake or Heather Lake -Camp only in designated sites at Pear and Emerald Lakes.	Atwell/Hockett Trail -No camping between the trail and Whitman Creek
High Sierra Trail -Camp only in designated sites at Bearpaw Meadow -Two night camping limit at Hamilton Lakes	Rae Lakes Loop area -Camp only in designated sites in Lower Paradise Valley -Two night camping limit in Paradise Valley -One night camping limit per lake between Dollar Lake and Glen Pass -No camping within ¼ mile of Bullfrog Lake -Two night camping limit at Charlotte and Kearsarge Lakes
Eagle/Mosquito Trails -No camping between the trail and Eagle Lake -No camping within ¼ mile of first Mosquito Lake	
Redwood Canyon -Two night camping limit	Mt. Whitney/Crabtree area -No camping at Timberline Lake

FOOD STORAGE RESTRICTIONS

Properly store food items when not in use to prevent bears and other wildlife from becoming conditioned to human food. Report any wildlife-related injuries, property damage, or unusual encounters to a ranger.

Food items include: any food meant for human or pack stock consumption; food-tainted garbage and recyclables such as empty cans, bottles, or food wrappers; any equipment with food residue or odor; toiletries such as soap, toothpaste, ointments, and lotions.

The only proper food storage methods are: using an approved portable animal-resistant food-storage container, using a permanent animal-resistant food-storage box, or using the counter-balance hanging technique. When camping in an area without food storage boxes or adequate trees for hanging food, you must carry an animal-resistant food-storage container.

Other food storage requirements:

- Portable park-allowed animal-resistant food-storage containers are required for storing all food items in the following areas: Rae Lakes Loop (including the Woods Creek drainage south from Pinchot Pass, the Bubbs Creek drainage north of Forester Pass, and the Kearsarge Lakes area), Dusy Basin/Bishop Pass Corridor, Rock Creek Drainage, and many Inyo National Forest trails.
- Food-storage boxes are for immediate on-site use only. Caching food or gear within food-storage boxes is prohibited. All food items must be removed from your car and stored in the food-storage boxes at the trailhead including containers such as ice chests unless they are completely empty and free of all food residue.

CAMPFIRE RESTRICTIONS

Note that during times of high fire danger, additional campfire restrictions may be implemented. Campfire restrictions also apply to the use of wood-burning camp stoves. (E.g. Biolite or "Zip stoves")

Kings Canyon National Park	Sequoia National Park Kaweah and Tule River Drainages (West of the Great Western Divide)	Sequoia National Park Kern River Drainage (East of the Great Western Divide)
-No fires above 10,000 ft. -No Fires in Granite Basin -No fires in Redwood Canyon	-No fires anywhere above 9,000 ft. -No fires in Hamilton Lakes Basin -No fires at Pinto Lake -No fires in Mineral King Valley above the ranger station -No fires in Summit Lake Basin -No fires in the Dillonwood area	-No fires anywhere above 10,400 ft. -No fires above 10,000 ft. at: Nine Lakes Basin, Big Arroyo, and within ¼ mile of the food-storage box at Lower Crabtree Meadow

Other campfire requirements:

- Where fires are allowed, use existing fire rings. Do not build new ones or add rocks to existing fire rings.
- Use only dead wood found on the ground. Do not chop live vegetation or remove dead branches from standing trees.
- Fires must be attended at all times.
- Do not burn trash.
- Put out fires with water ½ hour before leaving your campsite and stir the ashes. Do not use dirt to put out fires.

SANITATION

- Human waste must be buried at least 6" deep and 100 ft. from trails, camps, and all water sources. Pack out used toilet paper.
- All soap, including biodegradable soap, should be used and disposed of away from water sources. Carry water 100 ft. from the source before washing. This includes washing clothes, dishes, and yourself.

FISHING REGULATIONS

A California fishing license is required. Below 9,000 ft. elevation, native species (Rainbow Trout, Sacramento Sucker, Kern Rainbow, Sculpin, and Roach) must be released and only barbless artificial flies or lures are authorized. State regulations apply above 9,000 ft.

ADDITIONAL SAFETY RECOMMENDATIONS

Wilderness is a place where self-reliance and preparedness is essential. Be prepared for a wide variety of hazardous situations.

- Do not camp under leaning trees or dead branches.
- Most wilderness illnesses are attributable to poor hygiene. Wash your hands often.
- We recommend that you boil, treat, or filter drinking water.

SEARCH AND RESCUE POLICY

Search and rescue actions are conducted on a discretionary basis. The level and necessity of the response is determined through evaluation of the situation by field personnel. Rescuer safety is always our first priority. These parks expect visitors to exhibit a high degree of self-reliance and responsibility for their own safety commensurate with the difficulty of their chosen activities. The higher risk the activity, the more you need to be prepared for dealing with emergency situations.

If you choose to carry a hand-held electronic signaling device, be familiar with its operation, limitations, and frequency of failure to transmit. Do not rely on it to summon rescue personnel or notify family you are "OK."

If you find yourself in a true emergency, and have exhausted all means of self-rescue/help, contact a ranger in the field or call Park Dispatch at 559-565-3195. There is little to no cell reception in most areas of these parks. When you make contact, provide clear, concise information regarding the nature and exact location of the problem or injury, as well as the number of people involved. Be aware that help may be several days out. Be prepared to help yourself.

I have read and understand the above policies and assure that all party members will comply:

EXPERIENCE YOUR AMERICA™

Group-Size Limits When Off Maintained Trails

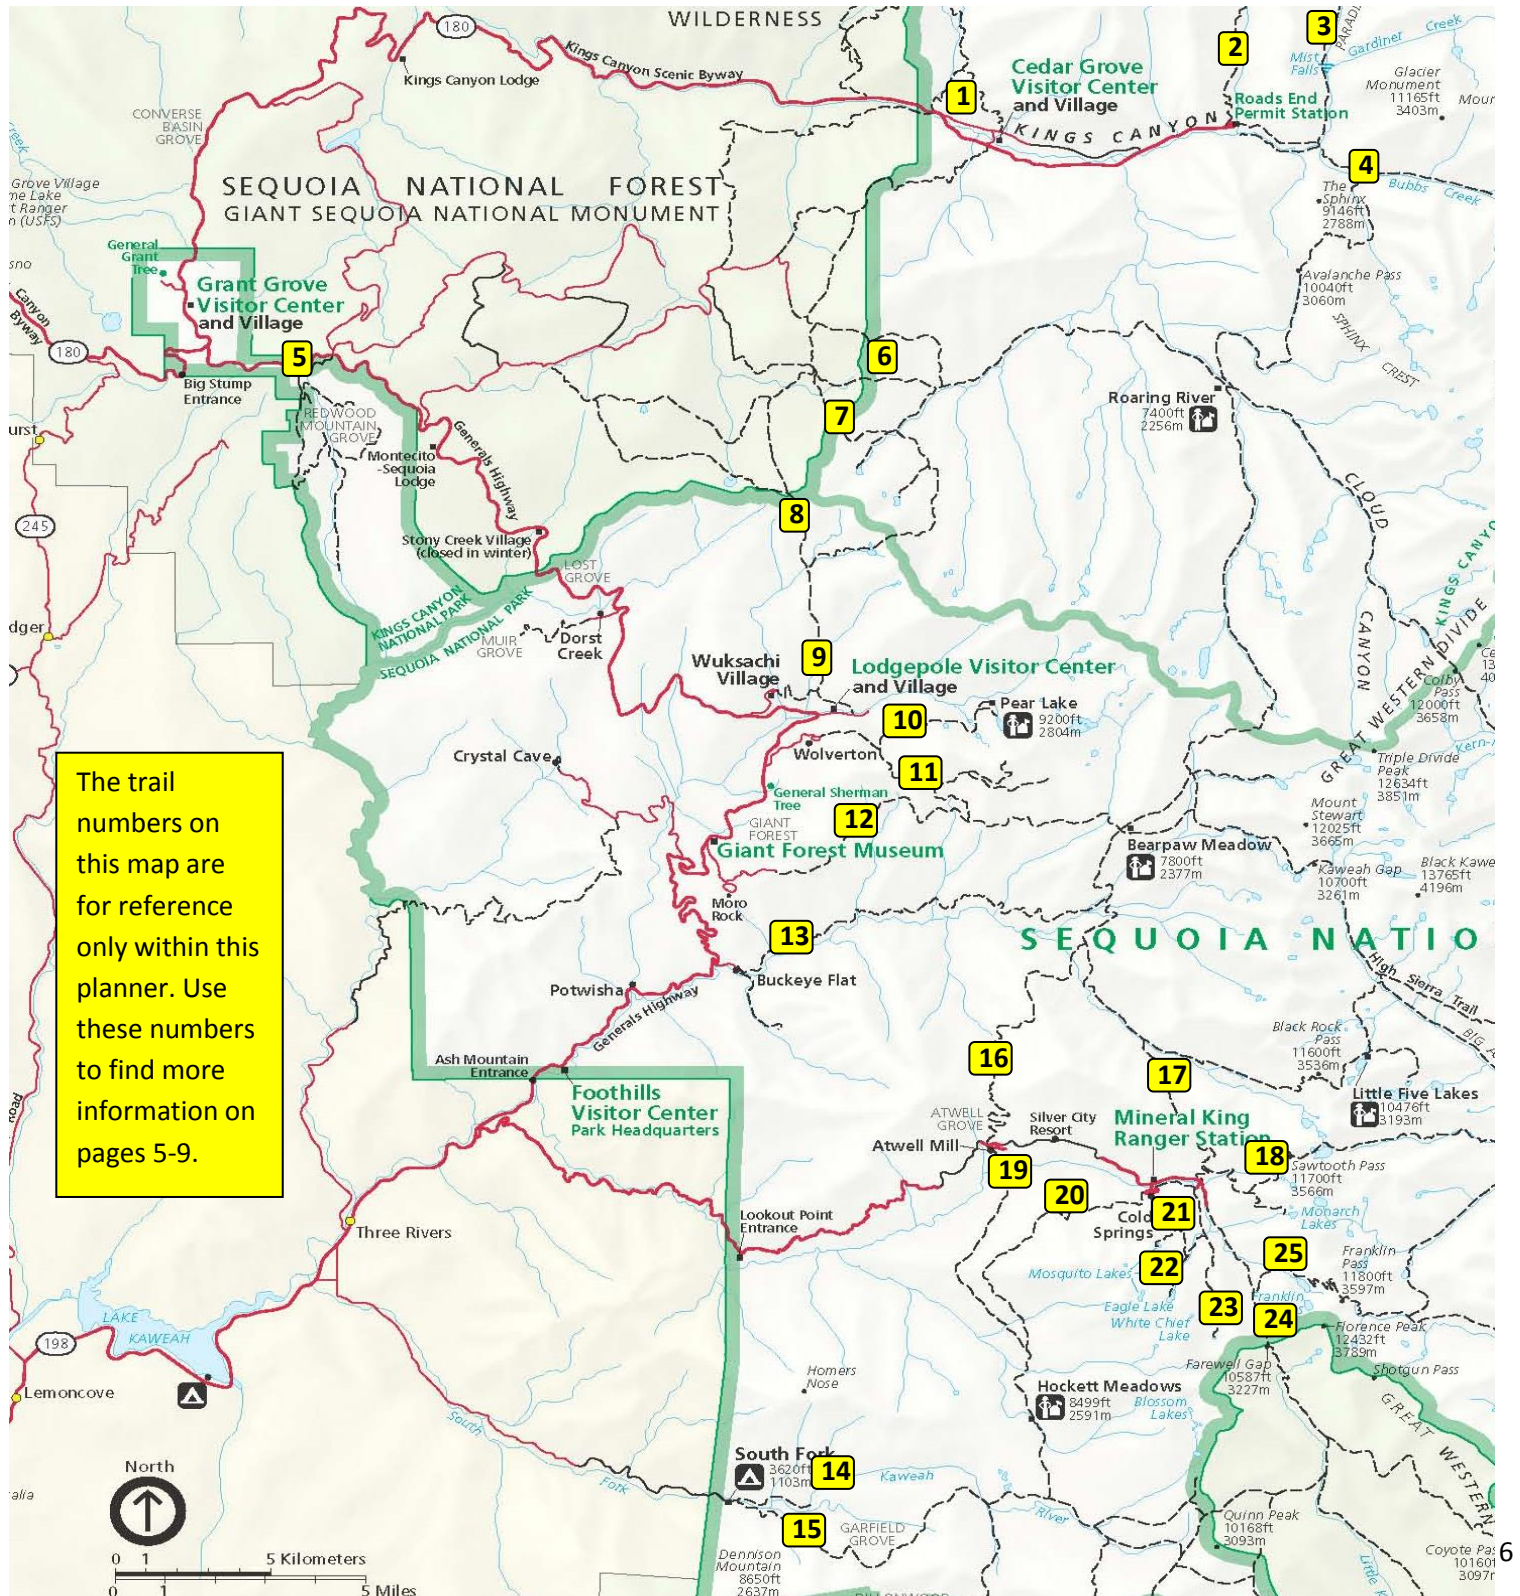

As more large groups have ventured off developed trails, impacts have increased, including trampling of vegetation and erosion. Groups traveling ½ mile or more off maintained trails are limited to no more than 8 individuals (people and stock combined) in the following areas:

- **Lamarck Col, Darwin Canyon and Darwin Bench Area** – west of park boundary/Sierra crest; east of John Muir Trail; south of Mt. Goethe; north of Mt. Darwin.
- **Dusy and Palisade Basin Areas** – west of park boundary/Sierra crest; east of John Muir Trail; south of Mt. Goode; north of Norman Clyde Peak
- **Sixty Lake and Gardiner Basin Areas** – west of John Muir Trail; east of Paradise Valley trail; south of Woods Creek Trail; north of Bubbs Creek Trail (i.e. inside of Rae Lakes Loop)
- **Sphinx Creek and Lakes, and Mt. Brewer Range Areas** – west of Reflection/East Lakes Trail (to Mt. Jordan); east of Avalanche Pass/Cloud Canyon Trail; south of Bubbs Creek Trail; north of Kings Canyon/Sequoia Park boundary
- **South of Mt. Whitney: Crabtree Lakes, Miter Basin, Mt. Langley, and Army Pass Areas** – west of park boundary/Sierra crest; east and north of Pacific Crest Trail; south of Mts. Russell & Young.

Trail Overview

From oak woodlands to granite peaks, the trails of Sequoia and Kings Canyon National Parks offer many wilderness travel options for any season. Snowshoes or skis make winter travel easier and good hiking boots usually suffice for the rest of the year. Within the parks, trails start from five major geographic areas: Cedar Grove/Roads End, Grant Grove, Lodgepole/Giant Forest, Foothills (Middle, South, and North Fork of the Kaweah River), and the Mineral King area. Trails also enter the parks from Inyo National Forest to the east, Sequoia National Forest to the south and west, and Sierra National Forest to the north and west. The trails described in this planner are merely the beginnings of an extensive network. Over 800 miles of maintained trails plus endless cross-country routes wind through the parks. Be sure to grab a detailed map and plan to take a day, a week, or a lifetime to explore. Information about purchasing maps and guidebooks is on page 31.

Cedar Grove/Road's End

Obtain permits for these trails at Road's End Permit Station (located at the end of Hwy 180) in Kings Canyon.

- Typical Hours from Memorial Day weekend to mid-September: 7am to 3:45pm
- Trailhead numbers correspond to the map on page 6.
- Abbreviations: JMT = John Muir Trail, PCT = Pacific Crest Trail

Trail #	Trail Name	Daily Entry Quota	Destination(s)	First Camping Area	Trailhead & High Point Elevations	USGS 7.5" Map(s)
1	Lewis Creek	25 people	Frypan Meadow, Kennedy Pass	3.5 miles to Comb Creek	4,000' & 10,820' at Kennedy Pass	Cedar Grove, Slide Bluffs

Leaves from Lewis Creek. Hot, strenuously steep, few people. Plan to start early in the day. Access to Grizzly Lakes, Kennedy Lakes, and Kennedy Canyon. Trail through Kennedy Canyon is faint and should be treated as a cross-country route. The Lewis Creek drainage showcases recent fire ecology. No campfires above 10,000 ft.

2	Copper Creek	20 people	Granite Basin & Lake	4.4 miles to Lower Tent Meadow	5,000' & 10,673' at Granite Pass	The Sphinx, Marion Peak
---	---------------------	-----------	----------------------	--------------------------------	----------------------------------	-------------------------

Leaves from Road's End. Hot and steep. Plan to start early in the day. Access to Granite Basin, Granite Lake, Volcanic Lakes, State Lakes, and Middle Fork of the Kings River. No campfires in Granite Basin or above 10,000 ft.

3	Woods Creek	25 people	Paradise Valley, Rae Lakes Loop	6.5 miles to Lower Paradise Valley	5,000' & 11,978 at Glen Pass	The Sphinx, Mt. Clarence King
---	--------------------	-----------	---------------------------------	------------------------------------	------------------------------	-------------------------------

Leaves from Road's End. Start of the very popular Rae Lakes Loop, in the easier clockwise direction. Dramatic and diverse. Steady, moderate climb. Access to the JMT/PCT. Two-night camping limit for Paradise Valley, Charlotte Lake, Kearsarge Lakes, and one night camping limit per lake in the Rae Lakes area (from Dollar Lake to Glen Pass). No campfires above 10,000 ft. Animal-resistant food-storage containers required. Many people.

4	Bubbs Creek	25 people	East lake, Rae Lakes Loop	4 miles to Sphinx Creek	5,000' & 11,978' at Glen Pass	The Sphinx, Mt. Clarence King
---	--------------------	-----------	---------------------------	-------------------------	-------------------------------	-------------------------------

Leaves from Road's End. Start of the popular Rae Lakes Loop, in the more strenuous counter-clockwise direction. Dramatic and diverse. Steep and strenuous to Sphinx Creek, then steady and moderate climb. Access to East Lake at Junction meadow. Access to the JMT/PCT at Vidette Meadow. Two-night camping limit at Charlotte Lake, Kearsarge Lakes, and one-night camping limit at each lake in the Rae Lakes area. No campfires above 10,000 ft. Animal-resistant food-storage containers required. Many people.

Grant Grove & Jennie Lakes Wilderness Area (US Forest Service)

Obtain permits for these trails at the Kings Canyon Visitor Center, located in Grant Grove

- Typical permit hours from Memorial Day weekend to mid-September: 8am to 4:30pm
- Trailhead numbers correspond to the map on page 6.

Trail #	Trail Name	Daily Entry Quota	Destination(s)	First Camping Area	Trailhead & High Point Elevations	USGS 7.5" Map(s)
5	Redwood Canyon	15 people	Redwood Canyon, Big Springs	2 miles to Redwood Creek	6,200' & 7,000' on Redwood Mtn.	General Grant Grove
Leaves from the Redwood Saddle. Relatively easy trail through one of the largest sequoia groves. Two 6.5-mile loops can be combined. Maximum group size is 10 people. Two-night camping limit. No campfires.						
6	Sugarloaf	25 people	Sugarloaf Valley, Roaring River	2 miles to Rowell Meadow	7,925' & 9,200' near Pond Mdw.	Mt. Silliman, Sphinx Lakes
Leaves from the Big Meadows Road (USFS). Moderate. Forests, creeks, meadows, glaciated canyons. Access from the Big Meadows Road to the Marvin Pass trailhead or the Sunset Meadow trailhead. No campfires above 10,000 ft.						
7	Belle Canyon	25 people	Seville, Lost, & Ranger Lakes	2 miles to Rowell Meadow	7,925' & 9,120' at unnamed saddle	Muir Grove, Mt. Silliman
Leaves from the Big Meadows Road (USFS). Moderate. Forests, lakes, vistas. Combine with the JO Pass Trail for a loop option through Jennie Lakes Wilderness. No campfires above 10,000 ft. in Kings Canyon National Park. No campfires above 9,000 ft. in the Kaweah River drainage of Sequoia National Park.						
8	JO Pass	15 people	Twin Lakes Clover Creek, Cahoon Gap	2 miles to Rowell Meadow	7,925' & 9,414' at JO Pass	Muir Grove, Mt. Silliman
Leaves from the Big Meadows Road (USFS). Moderate. Forests, lakes, vistas. Combine with the Belle Canyon Trail for a loop option through Jennie Lakes Wilderness. No campfires above 10,000 ft. in Kings Canyon National Park. No campfires above 9,000 ft. in the Kaweah River drainage of Sequoia National Park.						

Special Note for Jennie Lakes Wilderness, Sequoia National Forest (USFS)

If you access Sequoia and Kings Canyon National Parks through the Jennie Lakes Wilderness (via trail #'s 6, 7, or 8) you are subject to the daily entry quota based on where you spend your first night in the national parks. If you camp only in the Jennie Lakes Wilderness and never camp in the national parks, you do not need a wilderness permit. The Sequoia National Forest only requires a fire permit, which is available at www.preventwildfireca.org. The forest service requires a fire permit for both campfires and camp stoves. For more questions about Sequoia National Forest areas call (559) 338-2251.

Lodgepole/Giant Forest Area Trails

Obtain permits for these trails at the Lodgepole Visitor Center during the summer quota season. Permits are self-issued at Giant Forest Museum during the winter months.

- Typical permit hours from Memorial Day weekend to mid-September: 7 am to 11 am & 12 pm to 3:30 pm
- Trailhead numbers correspond to the map on page 6.

Trail #	Trail Name	Daily Entry Quota	Destination(s)	First Camping Area	Trailhead & High Point Elevations	USGS 7.5" Map(s)
9	Twin Lakes	30 people	Twin Lakes	3 miles to Cahoon Meadow	6,700' & 10,160' at Silliman Pass	Mt. Silliman, Lodgepole

Leaves from Lodgepole Campground area. Moderately steep. Forests, meadows, lakes. Connect with trail #'s 6, 7, and/or 8 to make a lollipop loop. No campfires above 9,000 ft. in Kaweah River Drainage (thus, no campfires at Twin Lakes) and no campfires above 10,000 ft. in Kings Canyon National Park.

10	Lakes Trail	25 people	Pear & Emerald Lakes, Tablelands	5 miles to Emerald Lake	7,200' & 9,500' at Pear Lake	Lodgepole
----	--------------------	-----------	----------------------------------	-------------------------	------------------------------	-----------

Leaves from Wolverton. Moderately steep. Lakes and cross-country access to the Tablelands. No campfires at the lakes or beyond in the Tablelands. No camping at Heather or Aster Lakes. Camp only in designated sites at Pear and Emerald Lakes. This trail is NOT RESERVABLE and daily quotas may vary during times of high use.

11	Alta	25 people	Alta Peak	3 miles to Panther Gap (no water)	7,200' & 11,200' at Alta Peak	Lodgepole
----	-------------	-----------	-----------	-----------------------------------	-------------------------------	-----------

Leaves from Wolverton. Steady climb to Alta Peak. Campfires only allowed at Panther Gap and Mehrten Meadow. A spur trail connects with the High Sierra Trail.

12	High Sierra	30 people	Bearpaw Meadow/ Mt Whitney	6 miles to Mehrten Creek	6,700' & 14,494' at Mt. Whitney	See complete list below
----	--------------------	-----------	----------------------------	--------------------------	---------------------------------	-------------------------

Leaves from Crescent Meadow. Eventually leads to the summit of Mount Whitney, approximately 70 miles away. A dramatic trans-Sierra route that crosses the Great Western Divide, drops to the Kern Canyon, and climbs again to the highest peak in the contiguous 48 states. Campfire restrictions vary; see page 4 for more details. Camp only at designated sites at Bearpaw Meadow. Topographic maps for entire trail include Lodgepole, Triple Divide Peak, Mt. Kaweah, Chagoopa Falls, Mt. Whitney, and Mt. Langley.

Special Note for Guests with Lodging at Bearpaw & Sequoia High Sierra Camps

- Bearpaw High Sierra Camp guests are not subject to the daily entry quota or the wilderness permit fee (provided all nights are spent at the camp). However, guests must still obtain a wilderness permit for the High Sierra Trail from the Lodgepole Visitor Center. If guests camp in the wilderness prior to, or after staying at the camp, the quotas and fees will apply.
- Sequoia High Sierra Camp is located in Sequoia National Forest. Guests do not need a wilderness permit unless camping within National Park Service boundaries prior to, or after staying at the camp.

Foothills Area Trails

During the summer, obtain permits for these trails Monday-Friday at the Wilderness Office, located near the Foothills Visitor Center. Inquire at Visitor Center for directions or call 559-565-3766. Permits for these trails may be self-issued at the Foothills Visitor Center on weekends.

During the winter months, permits are self-issued at the Foothills Visitor Center or at the Southfork campground area.

- Permit hours from Memorial Day weekend to mid-September: 8 am to 4:00 pm
- Trailhead numbers correspond to the map on page 6.

Trail #	Trail Name	Daily Entry Quota	Destination(s)	First Camping Area	Trailhead & High Point Elevations	USGS 7.5" Map(s)
13	Middle Fork	25 people	Redwood Meadow Grove, Bearpaw Meadow	3.5 miles to Panther Creek	3,800' & 7,800' at Bearpaw Meadow	Lodgepole, Triple Divide Peak
Leaves from east of Buckeye Campground. Slight grade along Middle Fork of Kaweah River and then steepens after 13 miles. Oaks, chaparral, river, vistas. Best in spring, fall, and winter; not recommended in heat of summer. Watch for ticks, poison oak, and rattlesnakes						
14	Ladybug	15 people	South Fork Grove	4 miles to Ladybug Camp	3,600' & 6,000' at South Fork Grove	Dennison Peak, Moses Mtn.
Leaves from South Fork Campground. Short trail ends at South Fork Grove in 5 miles. Giant sequoia trees, river. Best in spring, fall, and winter. Watch for ticks, poison oak, and rattlesnakes.						
15	Garfield Grove	15 people	Garfield Grove, Hockett Plateau	4 miles to Garfield Grove	3,600' & 8,500' at Hockett Meadow	Dennison Peak, Moses Mtn.
Leaves from South Fork Campground. Steep and challenging climb. Good early-season trail. Giant sequoia trees; meadows and lakes on plateau. Watch for ticks, poison oak, and rattlesnakes at lower elevations.						

Special Note for Foothills Visitors

For your personal safety, carefully weigh the risk of venturing off trail in the foothills. Illegal marijuana gardens and associated drug traffickers have been found in these areas. These parks work diligently to address the problem, but you should be aware of the issue. If you stay on the established trails you should greatly minimize, if not eliminate, the risk. Report anything suspicious to a park ranger.

Mineral King Area Trails

Obtain permits for these trails at the Mineral King Ranger Station.

- Typical permit hours from Memorial Day weekend to mid-September: 8 am to 4:00 pm
- Trailhead numbers correspond to the map on page 6.

Trail #	Trail Name	Daily Entry Quota	Destination(s)	First Camping Area	Trailhead & High Point Elevations	USGS 7.5" Map(s)
16	Paradise Ridge	15 people	Atwell Grove, Redwood Mdw	3 miles to Paradise Ridge (no water)	6,500' & 8,400' at Paradise Ridge	Silver City, Lodgepole
Leaves from Atwell Mill Campground. Steep and dry on both sides of Paradise Ridge. Giant Sequoias and vistas. Side trip: unmaintained trail to Paradise Peak. Nine miles to Redwood Meadow. Trail is difficult to follow.						
17	Timber Gap	25 people	Cliff Creek	2.7 miles to Timber Gap	7,800' & 9,400' at Timber Gap	Mineral King
Leaves from Sawtooth Trailhead. Forests to Cliff Creek, alpine access over Blackrock Pass. Combine with trail #s 18 or 25 for loop options past Little and Big Five Lakes. See page 4 for campfire restrictions in the area.						
18	Sawtooth Pass	20 people	Monarch & Crystal Lakes	4 miles to Lower Monarch Lake	7,800' & 11,630' at Sawtooth Pass	Mineral King
Leaves from Sawtooth Trailhead. Steep and strenuous. Lakes, vistas. Access to Kern Canyon. Rough, difficult to follow, unmaintained trail between Monarch and Columbine Lakes over Sawtooth Pass. Can combine with trail #s 17 or 25 for loop options. No campfires west of Sawtooth Pass. See page 4 for campfire restrictions in the Kern River Drainage.						
19	Atwell-Hockett	25 people	Hockett Plateau	6 miles to Clover Creek	6,600' & 8,500' at Hockett Meadow	Silver City, Moses Mountain
Leaves from Atwell Mill Campground. Moderate. Giant Sequoias, forests, meadows. 9.8 miles to Hockett Meadow. Popular stock trail.						
20	Tar Gap	25 people	Hockett Plateau	4 miles to Deer Creek	7,500' & 8,600' at Tar Gap Ridge	Silver City, Moses Mountain
Leaves from Cold Springs Campground. Moderate. Giant Sequoias, forests, meadows. 9.4 miles to Hockett Meadow. Popular stock trail.						
21	Mosquito/ Mineral	25 people	Mosquito Lakes	4 miles to Mosquito Lake #2	7,800' & 9,080' at Mosquito lake #2	Mineral King
Leaves from Eagle/ Mosquito Trailhead. Moderately strenuous. Lakes, forests, vistas. Cross-country to upper Mosquito Lakes and Mineral Lakes. No campfires.						
22	Eagle Lake	20 people	Eagle Lake	3.4 miles to Eagle Lake	7,800' & 10,010' at Eagle Lake	Mineral King
Leaves from Eagle/ Mosquito Trailhead. Steady and steep. Lakes, vistas, sinkholes. No camping between the trail and the lake. No campfires.						
23	White Chief	25 people	White Chief Bowl	4 miles to White Chief Bowl	7,800' & 10,200' at trail's end	Mineral King
Leaves from Eagle/ Mosquito Trailhead. Moderately strenuous. Colorful canyon filled with history. Meadows, sinkholes, mines, vistas. No campfires.						
24	Farewell Gap	No quota	Golden Trout Wilderness	3.4 miles to Farewell Junction	7,800' & 10,600' at Farewell Gap	Mineral King
Leaves from Franklin Pass Trailhead. Steep and strenuous. Lakes, vistas. Access to points in Golden Trout Wilderness (such as Bullfrog Lakes and Little Kern River) and Kern Canyon. No campfires north of Farewell Gap. See page 4 for campfire restrictions in the Kern River drainage of Sequoia National Park.						
25	Franklin Pass	30 people	Franklin Lakes	6 miles to Lower Franklin Lake	7,800' & 11,800' at Franklin Pass	Mineral King
Leaves from Franklin Pass Trailhead. Steep and strenuous. Lakes, vistas. Access to Kern Canyon. No campfires west of Franklin Pass. See page 4 for campfire restrictions east of Franklin Pass in the Kern River drainage. Combine with trail #s 17, 18, or 24 for loop options.						

Special Note for Mineral King Visitors:

See "Marmots in Mineral King" on page 26.

Mount Whitney, John Muir and Pacific Crest Trails

Mount Whitney

As the highest peak in the contiguous 48 states, Mount Whitney is an extremely popular destination. Inyo National Forest administers an annual lottery via recreation.gov for access to Mt. Whitney from east of the Sierra Nevada Divide. For more information on obtaining permits from the east side, contact Inyo National Forest at (760) 873-2483 or visit www.fs.usda.gov/main/inyo/passes-permits/recreation.

Permits obtained for the western trailheads from Sequoia & Kings Canyon National Parks are valid to climb Mt. Whitney and exit via the Mount Whitney Trail - no extra permits are required. Keep in mind that the hike is much longer. For example, if you start on the High Sierra Trail from Crescent Meadow, you must travel nearly 80 miles across the Sierra Nevada to exit at Whitney Portal.

With tens of thousands of people in this fragile, alpine environment every year, human waste and toilet paper must be packed out. Pack-out kits (also called wag bags) are available at the Eastern Sierra Interagency Visitor Center in Lone Pine. They are also available west of the Sierra Nevada Divide from permit issuing locations in Sequoia & Kings Canyon (to be used from Guitar Lake to Whitney Portal).

Altitude sickness is an illness that can occur when at high altitude (typically above 8,000 feet or 2,400 m). Symptoms of mild to moderate altitude sickness include dizziness, fatigue, headache, shortness of breath, and rapid heart rate. The best treatment for altitude sickness is to descend to a lower altitude.

Animal-resistant food storage containers are required when camping on the east side of Trail Crest. All food, trash, and scented items must fit inside the container while in the Mount Whitney zone. A map of this zone is available at http://www.fs.usda.gov/detail/inyo/recreation/?cid=fsbdev3_003846

Pacific Crest National Scenic Trail (PCT)

Stretching from the Mexican border to beyond the Canadian border, the Pacific Crest National Scenic Trail is one of our country's classic long distance trails. Of the PCT's 2,638 miles, nearly 100 miles pass through these parks.

As a thru-hiker, you must obtain a permit through the Pacific Crest Trail Association (www.pcta.org). As a section hiker, you obtain a permit from the agency who manages your starting trailhead. Both types of wilderness permits are valid for travel through these parks.

The PCT passes through the Rock Creek and Rae Lakes Loop animal-resistant food-storage container requirement areas (described on page 18) where through-hikers are required to either use animal-resistant containers or food-storage boxes located along the trail. You must use the animal-resistant containers or boxes to store all your food, garbage, and scented items.

John Muir Trail (JMT)

The same food-storage requirements described above for PCT hikers also apply to JMT through-hikers. From its northern terminus in Yosemite Valley, the JMT runs northeast, passing south of Half Dome and then on to Tuolumne Meadows. From there the trail turns south, through Yosemite National Park, Inyo and Sierra National Forests and Kings Canyon National Park, and ending on Mount Whitney in Sequoia National Park

Food Resupply

Food drops are allowed only when you are there, in person, to receive the delivery **directly** from a friend or a commercial pack station. All food wrappers, empty boxes, and other trash must be carried out by the person meeting you. Food drops **CANNOT** be left in food-storage boxes or cached anywhere in the park. If food is found, it will be confiscated by rangers.

Mailing Supplies to the Front Country

The US Post Office in Grant Grove is open year-round. Call 559-335-2499 for guidelines about mailing packages via general delivery.

The Visitor Center in Cedar Grove will also accept packages. Pack with mice in mind and include a “dispose by” date. Hikers's name, C/O Cedar Grove Rangers, PO Box 926, Kings Canyon NP, CA 93633

Wilderness Permits

Trips Starting Inside Sequoia & Kings Canyon National Parks

To protect the wilderness and preserve the wilderness experience for present and future generations, all overnight trips require a wilderness permit subject to daily entry quotas for each trail. Day hikes do not require a permit, except for Mount Whitney (see page 12 for more details). Wilderness permits are only issued at the visitor center or permit station closest to the trailhead (see pages 6, 7-11). The trail descriptions in the previous pages detail where permits can be obtained and the daily entry quota for each trail.

Inside the Quota Period

Daily entry quotas (the number of people who are allowed to start hiking on a trail each day) are in place from the Friday before Memorial Day weekend through late September every year. During this time, each permit incurs a \$15 wilderness camping fee, regardless of the group size or length of trip.

Outside the Quota Period

From late September to the Thursday before Memorial Day weekend, permits are not limited by quotas. Wilderness permits are still required; they are self-issued at the visitor center or permit station closest to the trailhead and are free.

Permit Reservations

Reservations for wilderness permits are available for approximately two-thirds of each daily entry quota (except the Lakes Trail – toward Emerald and Pear Lakes –which cannot be reserved). Permit reservations are highly recommended for large groups, holiday weekends, and late summer weekends.

A Wilderness reservation confirmation letter is not a wilderness permit and cannot be used for overnight travel. Your confirmation letter will include details of where to pick up your permit. Permits are issued during normal operating hours by trailhead rangers who provide important area information. There are no “night drops.” You can pick up your wilderness permit on the afternoon prior to your hike date (after 1:00 pm) or by 9:00 am on the morning of your entry date. If you need to pick up your permit later than 9:00 am on the morning of your entry date, notify the Wilderness Office at (559) 565-3766 or seki_wilderness_office@nps.gov. If you do not make arrangements for a late pickup, your reservation may be cancelled at 9:00 am and your spots given to people waiting for walk-up permits.

The Wilderness Office receives a high volume of phone calls and e-mails. Please review this trip planner and our website prior to calling or sending an email about trip planning.

Walk-up/First-come, First-serve Permits

Approximately one-third of each quota is available on a first-come, first-serve basis at the station closest to the trailhead starting at 1 pm the day before departure, or on the day of departure (see pages 6, 7-11 for typical permit issuing hours or visit http://www.nps.gov/seki/planyourvisit/wilderness_permits.htm

Guests of Bearpaw & Sequoia High Sierra Camps:

Please read the box titled “Special Note for Guests of Bearpaw & Sequoia High Sierra Camps” on page 9.

Wilderness Permits (continued)

For Trails Starting Outside Sequoia and Kings Canyon National Parks

Inyo National Forest issues permits east of the parks. Most trails have quotas and reservations are accepted. Popular trails into the parks include: Piute Pass, Bishop Pass, Taboose Pass, Sawmill Pass, Baxter Pass, Kearsarge Pass, Shepherd Pass, Trail Pass (Mount Whitney), Cottonwood Lakes, and Cottonwood Pass. For reservations, go to www.recreation.gov. For more information contact the Inyo National Forest Wilderness Office at (760) 873-2483, or the Eastern Sierra Interagency Visitor Center at (760) 876-6222, or visit <http://www.fs.usda.gov/inyo>.

Sequoia National Forest issues permits to the south and west of the parks, has no quotas, and only requires wilderness permits for the Golden Trout Wilderness (not for the Jennie Lakes Wilderness). Fire permits are required for camp fires and camp stoves and can be obtained online at www.preventwildfireca.org. Common trails into the parks from the Golden Trout Wilderness include Forks of the Kern, Jerky, Fish Creek, Clicks, Summit, and Long Canyon. For more information contact Sequoia National Forest (559) 784-1500 or visit www.fs.usda.gov/sequoia.

Sierra National Forest issues permits to the north and west of the parks. Quotas exist and reservations are accepted. Common trails into the parks include Crown/Rancheria, Courtright, Deer Cove, Florence, and Mono Creek. For more information contact Sierra National Forest at (559) 855-5360 or visit www.fs.usda.gov/sierra.

Trailhead Name	From Whom to Get Wilderness Permits	Destination Inside Sequoia & Kings Canyon National Parks
Baxter Pass	Inyo National Forest	Baxter Lakes, Rae Lakes, Sixty Lakes Basin
Bishop Pass	Inyo National Forest	Dusy Basin, LeConte Canyon
Clicks	Sequoia National Forest	Kern Canyon, Mineral King
Courtright	Sierra National Forest	Goddard Canyon
Cottonwood Lakes	Inyo National Forest	Rock Creek, Miter Basin, Soldier Lakes
Cottonwood Pass	Inyo National Forest	Rock Creek, Siberian Outpost
Crown/Rancheria	Sierra National Forest	Tehipite Valley, Middle Fork Kings River
Fish Creek	Sequoia National Forest	Kern Canyon
Florence Lake	Sierra National Forest	Evolution Valley, Goddard Canyon
Forks of the Kern	Sequoia National Forest	Kern Canyon
Jerky	Sequoia National Forest	Kern Canyon
Kearsarge Pass	Inyo National Forest	Kearsarge Lakes, Charlotte Lake, Rae Lakes, Center Basin
Lamarck Lakes	Inyo National Forest	Darwin Canyon, Evolution Valley
Lewis Camp	Sequoia National Forest	Kern Canyon
Long Canyon	Sequoia National Forest	Hockett Plateau, Mineral King
Meysan Lake	Inyo National Forest	Miter Basin
Mount Whitney	Inyo National Forest	Hitchcock Lakes, Crabtree
North Fork, Lone Pine Creek	Inyo National Forest	Mount Russell, Tulainyo Lake, Wales Lake, Wallace Lake
North Fork, Big Pine Creek	Inyo National Forest	Dusy Basin, Palisades Basin
Piute Pass	Inyo National Forest	Evolution Valley
Sawmill Pass	Inyo National Forest	Woods Lake, Twin Lakes
Shepherd Pass	Inyo National Forest	Diamond Mesa, Tyndall Creek, Bighorn Plateau
South Fork, Big Pine Creek	Inyo National Forest	Palisades Basin, Dusy Basin
Summit	Sequoia National Forest	Hockett Plateau, Mineral King, Kern Canyon
Taboose Pass	Inyo National Forest	Bench Lake, Upper Basin
Wishon Reservoir	Sierra National Forest	Ionian Basin, Goddard Canyon

Wilderness Permit Application

Reservations are available for the following trailheads:

Cedar Grove Area (Trails 1-4 in the [Wilderness Trip Planner](#)): Lewis Creek, Copper Creek, Woods Creek, Bubbs Creek
Grant Grove Area (Trails 5-8): Redwood Canyon, Sugarloaf, Belle Canyon, JO Pass
Lodgepole Area (Trails 9-12): Twin Lakes, Alta, High Sierra
Foothills Area (Trails 13-15): Middle Fork Kaweah River, Ladybug, and Garfield Grove
Mineral King Area (Trails 16-25): Paradise Ridge, Timber Gap, Sawtooth Pass, Atwell-Hockett, Tar Gap, Mosquito Lake, Eagle Lake, White Chief, Farewell Gap, Franklin Pass

Permits for trips to Pear and Emerald lakes are issued on a first-come, first-served basis at Lodgepole Visitor Center.

Reservation applications are accepted from midnight (PST), **March 1 to mid-September**. Applications received outside of this time frame will not be processed. Applications must be received **a minimum of two weeks in advance** of a trip's start date. Payment must accompany the application.

For more information, visit www.nps.gov/seki/planyourvisit/wilderness.htm or call 559-565-3766.

Trip Information

List alternate entry dates and/or trails, in order of preference, in case your first choice is unavailable. Your entire party must start on the entry date at the entry trail listed on your permit. Exit dates and exit trails can be estimated.

Entry Date	Entry Trail	Exit Date	Exit Trail
1			
2			
3			
4			

Preferred number of people in group: _____ Minimum number of people acceptable: _____ Number of stock animals: _____

Is this a guided/organized group? _____ If yes, group name: _____

To find out if your group requires a Special Use Permit (SUP) or a Commercial Use Authorization (CUA), go to www.nps.gov/seki/planyourvisit/permits.htm. Additional fees are associated.

Trip Leader Information

Name _____ City _____ State _____
Address _____ Zip _____
Daytime phone _____ Email (for confirmation letter) _____

Payment

Reservations require payment of the \$15 wilderness camping fee. Fees are non-refundable once they have been processed. Make checks and money orders payable to **National Park Service**. To pay by credit card, please provide the following:

Credit card # _____ Expiration Date _____
Name on card _____ Signature _____

Submit Applications

Mail: Sequoia & Kings Canyon National Parks

Wilderness Permit Reservation Instructions

Sequoia & Kings Canyon National Parks

Step 1: Fill out the application form.

Fill out the form electronically prior to printing it out, or write legibly. Please include a daytime phone number to avoid delays with your reservation. Use the Wilderness Trip Planner on our website to find trailhead names. Only one application and payment is needed per group. (Duplicate applications may result in duplicate, non-refundable charges.) To reserve more than one trip, fill out a separate application for each trip, and include payment with each application.

Step 2: Include payment of the \$15 wilderness camping fee with your application.

The wilderness camping fee is the same for all reservations, regardless of the group size or trip length. Payment can be made by credit card (VISA, MC, AMEX, Discover, JCB, or Diner's Club; be sure to provide a signature) or by check/money order payable to the National Park Service. The fee is not refundable, not transferable to other parties or future years, and not for re-sale. If we cannot process your reservation, we will contact you and your credit card will not be charged or your check/money order will be returned or destroyed.

Step 3: Mail or fax your wilderness permit application.

Mail to: Sequoia & Kings Canyon National Parks, Wilderness Office, 47050 Generals Hwy #60, Three Rivers, CA 93271, or fax to: (559) 565-4239. Applications cannot be submitted over the phone or by email.

Step 4: Read and print your emailed confirmation letter.

The Wilderness Office processes applications in the order they are received. Applications received prior to March 1 will not be processed. All applicants will receive an email response within two weeks.

Step 5: Bring your confirmation letter to pick up your wilderness permit.

Your confirmation letter is **not** a wilderness permit and cannot be used for overnight travel. Your confirmation letter will include details of where to pick up your permit. Permits are issued during normal operating hours by trailhead rangers who provide important area information. There are no "night drops." You can pick up your wilderness permit on the afternoon prior to your hike date (after 1:00) or by 9:00 am on the morning of your entry date. If you need to pick up your permit later than 9:00 am on the morning of your entry date, notify the Wilderness Office (559-565-3766 or seki_wilderness_office@nps.gov).

If you do not make arrangements for a late pickup, your reservation will be cancelled at 9:00 am and your spots may be given to people waiting for walk-up permits.

Frequently Asked Questions

Can I make changes to my trip after my application is processed?

Changes to the entry date or trail and increases in group size must be made at least one week before your entry date. One change can be made with no cost. Any additional changes result in a \$10 processing fee. (Changes to reduce group size can be made at any time with no additional cost.)

When are permits required? When are entry trail quotas in place?

Permits are required year-round for all overnight wilderness trips. Daily entry-trail quotas are in place from the Friday before Memorial Day through late September. Outside the quota period, permits are self-issued at visitor centers or permit stations. Permits are not required for day hikes. Permits for the Lakes Trail (to Emerald and Pear Lakes) cannot be reserved, and are available on a first-come, first-served basis.

Are there limits on group sizes?

The maximum group size is 15 people (10 in Redwood Canyon, and 8 when traveling off maintained trails in certain areas). Your group must use the entry trail on the entry date shown in the confirmation letter, and travel together throughout the trip. If your group is larger than 15, you must split into smaller groups that travel and camp at least ½-mile apart.

For more wilderness information, including specific restrictions and requirements related to camping, campfires, and portable animal-resistant food-storage containers, visit our website at www.nps.gov/seki/planyourvisit/wilderness.htm. **Have a great trip!**

Leave No Trace

Note: Italicized sections of text in this section are legal restrictions in these parks and offenses are citable.

Leave No Trace is a national education program that promotes the responsible enjoyment and active stewardship of the outdoors. The National Park Service is just one of many partners encouraging everyone to practice the seven principles of Leave No Trace. For other tips and more details about Leave No Trace, visit www.lnt.org.

Plan Ahead and Prepare

Know the restrictions, regulations and special concerns for the area you'll visit. Prepare for extreme weather, hazards, and emergencies. Visit in small groups when possible. *Maximum group size is 15 people & 20 head of stock, 8 in some off-trail areas.* Select terrain, mileage, and elevation changes that match the skills and abilities of your group. Carry appropriate food, clothing, equipment, and water. Ensure you have the essentials. Repackage food to minimize waste.

Travel and Camp on Durable Surfaces

Never camp on vegetation, especially meadows. Camp on bare ground, such as established sites, rock, gravel, or snow. Avoid camping beneath dead trees or overhanging dead branches. Protect riparian areas by camping at least 100 ft. from water where terrain permits. Campsites must always be at least 25 ft. from water. Good campsites are found, not made. *"Improvements" such as rock walls, trenches, or bough beds are prohibited. Building new fire rings is prohibited.*

Dispose of Waste Properly

Pack out all trash, leftover food, and litter. Inspect your campsite and rest areas for trash or spilled foods. Deposit solid human waste in cat holes dug 6 to 8 inches deep at least 100 ft. from water, campsites, and trails. Cover and disguise the cat hole when finished. Pack out toilet paper and hygiene products. Bring plastic baggies solely for this purpose. Never use any type of soap directly in a water source to wash yourself, dishes, or clothes. Carry water for these purposes at least 100 ft. away from streams and lakes. Scatter strained dishwater.

Leave What You Find

Preserve the past. *Do not take or disturb cultural or historic artifacts. Leave rocks, plants and other natural objects as you find them.* Avoid introducing or transporting non-native species - brush off your boots and clean your trekking poles before and after your trip.

Minimize Campfire Impact

Follow the campfire restrictions detailed on page 4. Campfires can cause lasting impacts. You create the least impact if you use only a stove for cooking and forego the campfire. Where fires are permitted, use established fire rings. Do not build new ones or enlarge existing ones. Keep fires small. Only use dead wood from the ground that can be broken by hand. Always attend the fire. Completely extinguish campfires by drowning with water (not dirt) and stirring until all heat is gone. Pack out trash (plastic emits toxic fumes when burned and aluminum foil does not burn).

Respect Wildlife

Observe wildlife from a distance. Do not follow, disturb, or approach them. *Never feed animals.* Feeding wildlife damages their health, alters natural behaviors, and exposes them to predators. Protect wildlife and your food by *storing food and trash securely.* See pages 18-19 for food-storage restrictions.

Be Considerate of Other Visitors

Respect other visitors and protect the quality of their experience. Be courteous. Yield to other users on the trail. Take breaks and camp away from trails and other visitors. Let nature's sounds prevail. Avoid loud voices and noises.

Food-Storage & Bears

Help keep all wildlife wild by paying close attention to the techniques and restrictions discussed on this page and pages 3, 18-19. Restrictions require proper food storage and prohibit feeding of any wildlife (violations can result in fines up to \$5000).

Among the wide diversity of animal species here in the parks is the black bear. Black bears (*Ursus americanus*) are the only species of bear in Sequoia and Kings Canyon National Parks and are an integral part of the Sierra ecosystem. They can be brown, blonde, gray, black, or colors in between. Bears naturally forage for food by digging up roots, ripping apart logs, and eating berries. When human food is made available to a bear, these intelligent animals quickly change their natural behavior in order to continue obtaining the high calorie items. They can become destructive and dangerous in their attempts to obtain human food. When that happens, for human safety, they must be killed. This change in behavior can happen quickly, so each encounter is an important opportunity for you to keep a bear wild and natural. By following all food-storage restrictions and suggestions you are helping to save the life of a bear.

Food items are defined as food meant for human or stock consumption, food-tainted garbage and recyclables (empty cans and bottles, food wrappers, etc.), toiletries such as soap, toothpaste, cosmetics, and lotions. Food containers such as ice chests and coolers are also considered “*food items*,” unless they are completely empty and free of food particles. If dirty, tableware and cookware must be washed or stored as a food item.

Mandatory Animal-Resistant Food-Storage Container Areas

Wilderness visitors must use portable park-approved animal-resistant food-storage containers within the Rae Lakes Loop vicinity, the Dusy & Palisades basins, and the Rock Creek drainage. This requirement is in effect from the Friday before Memorial Day through October 31. All garbage, scented items & food must be stored in the containers. Only long distance PCT and JMT through-hikers may store food items in the metal food-storage boxes, instead of carrying containers. Where containers are required, the counter-balancing technique of hanging food is prohibited.

- Rae Lakes Loop & Vicinity: This area is accessed from Cedar Grove on the Bubbs Creek Trail or the Woods Creek Trail, from the John Muir Trail between Forester Pass and Sawmill Pass, and from the east via Sawmill Pass or Kearsarge Pass. The Inyo National Forest has an adjacent requirement in the Kearsarge Pass area that applies to all visitors.
- Dusy & Palisades Basins: This area includes Bishop Pass to the junction with the John Muir Trail in LeConte Canyon, Dusy Basin, and Palisades Basin. The Inyo National Forest has an adjacent requirement in the Bishop Pass area that applies to all visitors.
- Rock Creek Drainage: This area includes Miter Basin, Soldier Lake, Siberian Outpost, Rock Creek proper, and all cross-country routes. Specifically the area defined as the Rock Creek drainage west of Cottonwood and New Army Passes, south of Crabtree Pass, south of Guyot Pass, and north-northwest of the Sequoia National Park boundary and Siberian Pass. The Inyo National Forest has an adjacent requirement in the Cottonwood Lakes/Pass area that applies to all visitors.

For maps of areas described above that require container use visit:

www.nps.gov/seki/planyourvisit/bear_bc.htm

http://www.fs.usda.gov/detail/inyo/recreation/?cid=fsbdev3_003846

Food-Storage & Bears (continued)

Best Idea: Carry and Use Food-storage Containers

Animal-resistant food-storage containers are strongly encouraged throughout the parks and are required in several areas. Permit issuing stations inside the parks rent them. For the latest models allowed and rental prices, visit our website. Other ranger stations outside the parks, such as those in Lone Pine and Bishop, have these containers available for rent. Also inquire at your local outdoor gear stores. Food-storage containers allow for maximum freedom when choosing campsites—you can stop when you're tired or explore areas without food-storage boxes (also known as "bear boxes"). Do not store animal-resistant food-storage containers in food-storage boxes. Your food is safe in a properly closed animal-resistant food-storage container. Leave the space for people who need the boxes to properly store their food.

Good Option: Use Food-Storage Boxes

When in working condition and used properly, the metal food-storage boxes (also known as "bear boxes") are bear-resistant. However, boxes are not completely reliable. Winter snows and trees can damage them. In popular areas at popular times, boxes may fill up. Thus, you should still carry rope to hang food (using the counter-balance method) in case the boxes are full or broken or you do not reach your intended destination. Remember: Boxes must be shared with others camping in the area and cannot be locked with your personal padlock. Food may NOT be cached in these boxes for future use. Rangers will confiscate cached food.

Last Resort: Counter-Balance

Effective counter-balancing can be extremely difficult to achieve. The smart, persistent bears of these parks may be able to retrieve your food. For illustrations and instructions to effectively counter-balance, be sure to visit:

www.nps.gov/seki/planyourvisit/bear_bc.htm . When camping in a location without food storage boxes and without adequate trees for hanging food, you must carry an animal-resistant food-storage container.

Before Your Trip

- Inform yourself about the food-storage restrictions in the areas you plan to visit. See pages 3, 18-19 for details. If you will be outside the container requirement areas, decide which method of food storage you will use (containers are highly recommended everywhere).
- If you decide to use food-storage boxes, please keep in mind they must be shared with others and locking them is not permitted. Carry rope to hang food in case the locker is full or you don't camp where you intended.
- Use the food-storage boxes at the trailheads to store any food containers or food you won't be taking with you. Bears break into vehicles if they see or smell signs of food.
- Black bears are interested in your food, not you. No fatality due to bears has ever been recorded in these parks. When injuries have occurred, they have ALWAYS been associated with improper food storage.

On the Trail

- Never leave scented items unattended or outside a container - even for a short time, like a bathroom break.
- If you are considering a nap on the trail, make sure all your food is stored properly before falling asleep. Napping hikers have been bitten by bears attempting to get food from pockets.

Around Camp

- Store soap, sunscreen, toothpaste, garbage, lip balm, and other scented items in the same manner as you will food. Bears are attracted to anything with an odor.
- If a bear comes into your camp, you can often scare it away by making loud noises (such as banging pots together). Be bold, but keep a safe distance and use good judgment.
- If a bear does get your food, NEVER attempt to get it back. You are responsible for cleaning up any mess, packing out the debris, and reporting the incident to the nearest ranger.

After Your Trip

Please report any injuries, property damage, or unusual encounters with bears to a park ranger before leaving the parks. Your reports may help prevent future problems. You may also contact: nps_seki_bear_mgmt@nps.gov.

Food-storage Locker Locations: Kings Canyon National Park

Note: Food storage locker locations and conditions listed below are accurate as of 2014. Box conditions can deteriorate. Some boxes may not be functional.

Bubbs Creek Drainage	
Sphinx Creek (2)	1 above Bubbs Creek trail east of crossing; 1 across creek on Avalanche Pass trail (fully functional but damaged)
Charlotte Creek (1)	below trail, east of crossing
Lower Junction Mdw (1)	next to trail, just below meadow
Junction Mdw (East Creek) (1)	west of East Creek Trail, south of Bubbs Creek log crossing
Vidette Meadow (2)	1 at Lower Vidette on south side of Bubbs Creek trail, west of JMT; 1 at east Vidette, on JMT above Bubbs Creek Junction, south side of trail
9,900' Elevation/JMT (1)	on south side of JMT, approximately 0.2 mile below "No Fires Above Here" sign; NOT FUNCTIONAL (DO NOT USE)
JMT/Center Basin Trail (1)	below trail approximately 150 yards south of JMT/Center Basin junction
East Lake (2)	1 at upper end of lake; 1 at lower end of lake
Charlotte Lake Area	
Charlotte lake (1)	at west end of lake
*Kearsarge Lakes (3)	1 at south end of upper small lake; 1 on north shore of largest upper lake; 1 on north shore of lowest small lake *DUE TO ILLEGAL FOOD CACHING, THESE WILL BE LOCKED IN 2015.
Copper Creek Trail	
Lower Tent Meadow (1)	below creek crossing, east side of creek
Lewis Creek Trail	
Frypan Meadow (1)	on upper side of meadow in campsite
Sugarloaf/Roaring River Area	
Ranger Lake (2)	1 on east side of lake; 1 on north end of lake
Seville Lake (2)	1 on north side of lake; 1 on west side of lake
Lost Lake (1)	in main camp area on north side of lake
Sugarloaf Meadow (1)	at south end of meadow near hitch rail
Roaring River RS (3)	1 west of bridge; 1-100 yards north of Lackey cabin; 1-200 yards south of cabin, west side of river.
Comanche Meadow (1)	next to trail near lower east end.
Woods Creek/Rae Lakes Area	
Lower Paradise Valley (2)	1 above trail; 1 below trail
Middle Paradise Valley (1)	above the trail
Upper Paradise Valley (2)	both below the river crossing
Woods Creek/JMT (2)	both on south side of foot bridge
Arrowhead Lake (1)	on east shore, next to trail
Lower Rae Lake (1)	East shore, west of the trail; NOT FUNCTIONAL (DO NOT USE)
Middle Rae Lake (2)	both east shore west of sign

Food-storage Locker Locations: Sequoia National Park

Note: Food storage locker locations and conditions listed below are accurate as of 2014. Box conditions can deteriorate. Some boxes may not be functional.

Kern Canyon	
Lower Funston Meadow (2)	200 yards east of trail between northeast corner of meadow and river
Upper Funston Meadow (2)	1 at northeast corner of meadow near river; 1-60 yards further south
Kern Hot Springs (2)	1 between trail and river; 1 in open pines 50 yards east of trail
Junction Meadow (1)	next to High Sierra Trail near southeast corner of meadow
Little Five Lakes Area	
Moraine Lake (1)	next to trail along east shore of lake
Cliff Ck/Timber Gap Jct. (1)	on east side of creek at trail junction
Pinto Lake (1)	on north side of trail
Little Five Lakes (1)	south of Blackrock Pass trail junction
Big Five lakes (1)	next to trail on northeast shore of lowest Big Five Lake
Big Arroyo Crossing (1)	on east side of Big Arroyo creek, southeast of trail junction
Lost Canyon/Big Five Jct. (1)	at Lost Canyon/Big Five trail junction
Lodgepole/Twin Lakes/Bearpaw/Lakes Areas	
Buck CK Crossing/HST (1)	on west side of creek
Bearpaw (4)	in main camp area
Mehrten CK Crossing/HST (1)	above trail on west side of creek
9 Mile Creek Crossing/HST (1)	below trail on west side of creek
Upper Hamilton Lake (3)	1 on west side of lake in open rocky area; 1-75 yards south of open rocky area; 1-200 yards west of lake NOT FUNCTIONAL (DO NOT USE) ; south of outlet stream
Emerald Lake (2)	between the trail and lake
Pear Lake (3)	on north side of lake (1); NORTH SIDE OF LAKE NEAR RESTROOM (2)
Clover Creek Crossing (Twin Lakes Trail (1)	on north side of first Clover Creek crossing (MAY LET MICE IN)
JO Pass Trail/Twin Lakes Jct. (1)	at trail junction
Twin Lakes (2)	1 at lower end of lake on trail; 1 at upper end of lake on trail
Mineral King Area	
Monarch lake (1)	100 yards northeast of lake outlet near some rock bluffs
Franklin Lake (2)	1 below dam, west of trail; 1 east of dam by 0.4 mile, 200 feet above lake
Hockett Meadow (3)	1 between ranger station and Whitman Creek bridge; 1 at the stock camp on the east edge of Hockett meadow; 1 in hidden camp/ stock camp.
South Fork of the Kaweah (3)	1 at stock camp on south shore of south fork of the Kaweah; 1 at main camp of the south fork pasture (upper camp) along north shore of the south fork of the Kaweah; 1 located 500 yards east of the upper camp also on the north shore of the south fork of the Kaweah.
Rock Creek Area	
Lower Rock Ck Crossing/PCT (1)	near trail on south side of crossing
Lower Rock Creek Lake (1)	north of trail on west end of lake
Lower Soldier Lake (1)	Follow sign to lake, box is adjacent to trail just south of the lake
Tyndall/Crabtree Areas	
Tyndall Ck Crossing/JMT (1)	west of trail, 350 feet north of creek
Wallace Creek/JMT (1)	west of trail, south of creek
PCT/Lower Crabtree Meadow (1)	south of Whitney Creek Crossing on west side of trail
Crabtree Ranger Station (1)	southeast of JMT, 100 yards south of ranger station

Fire in the Wilderness

Natural Fire

During your visit to Sequoia and Kings Canyon National Parks, you may see a wildfire or its smoke in the wilderness. Fire has been a natural part of the Sierra Nevada ecosystem for centuries and the parks' allow this natural wilderness event when it is safe to do so.

Natural fires occur at frequent intervals. Fire thins competing species, recycles nutrients into the soil, releases seeds for germination, and opens holes in the forest canopy for sunlight to enter. All of these are critical to the health of the Sierra Nevada forests. Yet another ecological benefit of regular lightning fires is that they limit the size and severity of subsequent fires.

Fires increase forage for deer and other grazers. Many animals hunt near the fire's edge. Fire also creates habitat for several animals including bird and rodents.

For more information about the parks' fire management program, please visit:

<http://www.nps.gov/seki/naturescience/ficwhyfire.htm>

<http://www.nps.gov/seki/naturescience/fire.htm>

Mountain Lions and Bighorn Sheep

Mountain Lions

Mountain lions (also known as cougars) are one of the wildest symbols of wilderness. When visiting their habitat, you should understand their behavior and act accordingly to protect them and yourself. The likelihood of seeing a lion is small and the likelihood of encountering an aggressive lion is even smaller. However, you should still be prepared.

Use extra caution if you are hiking alone. Watch children closely, never let them run ahead on the trail. If you cross paths with a mountain lion, the key goal is to convince it that you are not prey. **DO NOT RUN!** Mountain lions often chase things that run because they associate running with prey. Do not crouch down. Try to appear as large as possible. Attempts to hide are unsuccessful - lions see most people long before people see lions. Hold your ground or back away slowly while facing the lion. If little children are with you, pick them up. If the lion behaves aggressively, wave your hands, shout, and throw stones or sticks at it. If attacked, fight back! Report any mountain lion sighting to a park ranger as soon as possible.

Sierra Nevada Bighorn Sheep

Sierra Nevada Bighorn Sheep are currently listed as endangered under both federal and state law. While this does not impose additional restrictions on wilderness travel in these national parks, the Inyo National Forest (immediately adjacent to our eastern border) may have additional restrictions to protect the bighorn sheep in specific areas. Please contact the Inyo National Forest for more information (see page 14).

Bighorn Sheep are now occupying the Great Western Divide for the first time in over 100 years due to recent efforts by state and federal agencies. For more information, please visit:

www.nps.gov/seki/naturescience/bighorn-sheep.htm

Safety in the Wilderness

Are You Prepared For This Trip?

One primary value of wilderness is that it is a place that allows us to be self-reliant in the natural world. It is wholly up to us to enjoy its benefits, and survive its challenges. Wilderness provides outstanding opportunities to recreate in a primitive setting. Preparation and planning before your trip increases the likelihood of your enjoyment and a successful adventure. When venturing into wilderness you are responsible for your own well-being.

Search & Rescue

Leave detailed trip plans (including anticipated travel routes and campsites) with someone who can notify the parks' 24-hour emergency dispatch center at (559) 565-3195 if you are more than 24 hours overdue. You should also leave a description of your equipment (tent color, clothing type/color, etc.) and provisions with your emergency contact. Each year, a number of park wilderness visitors become ill, injured, or incapacitated in some way. It is our policy to assist those in need when it is necessary, within the skill capabilities of available staff, and when it can be accomplished in a manner that provides reasonable safety for search and rescue personnel.

Search and rescue actions are conducted on a discretionary basis. The level and necessity of the response is determined through evaluation of the situation by field personnel. Rescuer safety is ALWAYS our first priority. As a wilderness traveler you are expected to exhibit a high degree of self-reliance and responsibility for safety commensurate with the difficulty of your chosen activities; more preparation is required to deal with emergencies as risk increases. If you find yourself in a true emergency, and have exhausted all means of self-rescue, contact a ranger in the field, or call park dispatch with a cell (signals are inconsistent), or satellite phone. There is little to no cell reception in most areas of these parks. When you make contact, provide clear, concise information regarding the nature & exact location of the problem or injury, as well as the number of people involved. Be aware that help may be several days out, and your best preparation is to be ready to help yourself.

If you get lost, stay put. Try to stay in a clearing or large rocky outcropping. Lay out a colorful tarp or build a small smoky fire in a safe area. Wait for searchers to find you.

High Water

Never underestimate the power of moving water—it can be deadly. Look for natural bridges such as logs or rocks. However, be careful, they can be extremely slippery. If none are available, wade across where the water is wide and shallow. Do not cross above rapids or gorges in case you fall. Unbuckle your pack's waist strap, face upstream, and use a long stick or hiking poles for stability. Wearing shoes is safer than crossing barefoot. If you are in a group, cross together holding on to one another. Do not tie yourself into ropes. Cross when the water level is lowest, usually in the morning, or choose another, safer, route.

Altitude Illness

Altitude illness can strike anyone. Typically it occurs at altitudes over 10,000 ft., but serious cases have occurred as low as 8,000 ft. Allow time for a slow ascent, adjusting gradually to altitude. Awakening with temporary shortness of breath is not uncommon. This alone is normally not a cause for alarm. Acute mountain sickness (AMS) usually starts as a mild illness with headache, nausea, difficulty sleeping, and fatigue. It is often treatable with rest, fluids, and mild analgesics, such as aspirin, acetaminophen, or ibuprofen. When AMS becomes severe, two life-threatening conditions may develop: High Altitude Pulmonary Edema (HAPE) or High Altitude Cerebral Edema (HACE). HAPE symptoms include extreme shortness of breath, the need to sit up to breathe, extreme fatigue, wheezing or coughing, and/or the inability to sleep. HACE symptoms include very severe headache, vomiting, confusion, loss of balance or coordination, and in later stages, loss of consciousness. Immediate descent to low altitude is the only cure. Get immediate help; the condition can progress rapidly and death is possible. The patient may walk slowly to low altitude if his/ her condition is not too severe. Extreme cases may require evacuation by helicopter with help from rangers. If a ranger cannot be found at a station, quickly proceed to the nearest trailhead to report the emergency.

Hypothermia

Hypothermia, which is a subnormal body temperature, can lead to mental and physical collapse and even death. Caused by combinations of cold, wetness, and wind, it is aggravated by exhaustion. Hypothermia can develop in any season. Stay dry. Wet clothes can lose up to 90% of their insulating value. Wool and synthetics provide better warmth when wet than down or cotton. Wet cotton will actually cause rapid cooling. Signs of hypothermia are uncontrollable shivering, slurred speech, memory lapses, incoherence, stumbling, drowsiness, and exhaustion. The victim may deny the problem. Believe the symptoms, not the victim. Even mild cases demand immediate attention. Shelter the victim from wind and rain. Strip off all wet clothes. Get them warm clothes and into a sleeping bag. Provide external sources of warmth such as warm drinks, hot water bottles or your own body heat. Keep them awake.

Safety in the Wilderness (continued)

Lightning

Watch for approaching storms and go to a safe area before they arrive. Avoid mountain peaks, ridges, open areas, lone trees, shallow caves, and cliffs. Forested areas away from the tallest trees are safer. If you are in a treeless area and cannot get to a safer place, lay out insulating material (such as a foam pad) on the ground and sit on it. Only your buttocks and feet should touch the material. Use this method only if there are no alternatives. Do NOT seek shelter in the Mt. Whitney Hut or the Muir Hut – lightning can be conducted to individuals inside.

Natural Fire

In this fire-dependent ecosystem, fire helps create a healthy mosaic of plant communities. Lightning fires are permitted to do their ecological work in large portions of these parks. You may have an opportunity to see or travel through a burning or recently burned area. Trail closures may be necessary for public safety. In other cases, trails may remain open. Use extreme caution and remain alert for possible hazards such as active fire, dense smoke, rolling rocks and logs, falling trees or branches, and stump holes.

Water Quality

Drink smart. Lakes and streams can be contaminated even if they look and taste pure. Giardia has been found in some mountain streams. The incubation period for this intestinal parasite is 6 to 15 days after ingesting contaminated water. Symptoms include nausea, abdominal cramps, flatulence, lethargy, diarrhea, and weight loss. The disease may persist for weeks or months if untreated. The most certain treatment to make water safe to drink is to bring it to a boil.

Many hikers prefer filtration for water treatment. Hand-pump filters with a pore size less than 0.5 micron should remove harmful bacteria and protozoa, including giardia.

Chemical disinfectants, such as iodine or chlorine tablets, are not as reliable as heat in killing giardia. Use chemical disinfectants in conjunction with a filtration system. Recent technology has made ultra-violet sterilizers practical to carry for wilderness visitors.

Hand Washing

Most illnesses contracted while in the wilderness are attributable to poor hygiene. Washing hands after using the “toilet” and before eating or preparing food (to prevent fecal contamination) is just as important as treating water. Waterless hand sanitizer comes in small, light-weight containers, perfect for your backpack.

Human-Waste Disposal

The potential health hazard from human waste is ever present. To prevent the spread of disease, dispose of your body waste properly.

Bury feces at least 6 inches deep and at least 100 ft. from water, trails, and campsites. Carry out your used toilet paper and dispose of properly. Double Zip-lock plastic bags work well.

Ticks

Ticks are found most commonly in naturally vegetated areas like woods and forests at lower elevations. These small insects attach to humans and other animals. Ticks then feed on the blood of their host for several days. In the spring and early summer smaller immature ticks – roughly the size of a poppy seed–called “nymphs” are most active.

Ticks may carry the bacterium that causes Lyme disease and can transmit the bacterium to humans while they feed. Early symptoms of Lyme disease often include a spreading rash accompanied by flu-like symptoms such as fever and body aches. While Lyme disease is the most common tick-borne illness in California, ticks can transmit other human illnesses, such as Rocky Mountain spotted fever.

California Department of Public Health recommends the following to avoid ticks and tick-borne diseases:

- Wear light colored long pants and long-sleeved shirts when spending time outdoors. Tuck pant legs into boots or socks and tuck shirts into pants.
- Apply repellents registered for use against ticks and stay on trails when hiking.
- Conduct a tick-check over your entire body, including the hairline, armpits, back of knees and groin after outdoor activities, including picnicking.
- Continue to watch for ticks for up to three days after returning from tick habitat.
- Parents should check their children thoroughly for ticks.

Safety in the Wilderness (continued)

Mountain Lions

If you do see a mountain lion in the wilderness, consider yourself lucky. Sightings are extremely rare. For more information, see page 23.

Poison Oak

Poison oak is a shrub common in the foothills up to 6,000 ft. To avoid encountering poison oak, learn to identify it. Poison Oak is often red in the fall with whitish berries, bare in the winter, and shiny green leaves in groups of three in the spring. Remember: leaves of three, let it be!

Long sleeves and pants are your best protection. Contamination between clothing can occur if stored together.

Rattlesnakes

Look before you step when you are in rattlesnake country. Use hiking poles especially in vegetation to act as a buffer for your leg. Cover your legs with pants and gaiters and wear shoes that cover the ankle, even during short night excursions. If you are bitten, remain calm and seek help.

Tree Hazards

Numerous trees fall over in wilderness areas throughout the summer months. Areas of high concern are previously burned areas, edges of meadows, and areas of beetle kill. Avoid walking through areas of high concern when windy, particularly in the late afternoon. An assessment of trees surrounding your camping area is always a good idea.

Trips/Falls

Most injuries occur when we are in a hurry or tired. Stretching every day reduces risk of injury. However, injuries can happen to anyone, regardless of age, experience, or fitness level. If you twist an ankle or knee, try not to fight gravity if you can help it. Tensing up and trying to catch your fall can often make the injury worse. Rest, Ice, Compress, Elevate (RICE) is helpful post-injury. Hiking poles and braces for problem joints can help prevent such mishaps.

Wilderness - General Warning

Travel in wilderness, by its nature is an exercise in self-sufficiency. Use caution and be realistic about your level and type of experience, skill and comfort. If you choose to carry a hand-held electronic signaling device, be familiar with its operation and limitations. Do not base your safety or rely on it to summon rescue personnel as it may fail in the field due to battery power, breaking, connection failures, etc. (see page 27). These parks expect visitors to exhibit a high degree of self-reliance and responsibility for their own safety commensurate with the difficulty of their chosen activities; that is, the higher risk the activity, the more you need to be prepared for dealing with emergency situations.

Marmots in Mineral King

Like bears, jays and ground squirrels, marmots have not only become accustomed to visitors, they have learned that people are a source of food. Marmots are the largest members of the squirrel family and occasional chewers of boots, backpack straps, hiking pole grips, and radiator hoses.

Each spring and early summer until mid-July, the marmots of Mineral King have been known to dine on radiator hoses and car wiring. They can disable a vehicle. On several occasions, marmots have not escaped the engine compartment quickly enough and unsuspecting drivers have given them rides to other parts of the parks; several have ridden as far as southern California!

Various means, including wrapping a tarp around the entire vehicle completely covering the wheel wells, and leaving vehicle hoods propped open, are used in an attempt to keep marmots from damaging vehicles. Wrapping chicken wire around the vehicle is no longer advised as marmots have found a way to defeat this method.

If you visit Mineral King, especially before mid-July, check under your hood before driving away. Let the rangers know whether or not your vehicle has been damaged.

Safety in the Wilderness (continued)

ADVISORY: EMERGENCY SATELLITE LOCATOR DEVICES

Using the **SOS** or **911** button on a satellite-locator device carries the same responsibility as dialing **911** from a telephone. Use these devices only to request help in a true emergency. Ask yourself: *are you willing to put other people at risk to solve your problem?*

Read this advisory before your trip in order to understand your responsibilities and the consequences of your actions. Know that rescues are risky to personnel and expensive to agencies. Rescuer safety is ALWAYS our first priority. Even if you activate the emergency beacon on a SPOT, PLB, or similar device, response may take longer than 24 hours depending on weather, time of day, your location, and other factors.

Responsibilities before leaving home:

- Know and consider your personal skills and limitations when planning your wilderness travel. Wilderness is a place for personal challenge, responsibility, and a high degree of self-reliance. Are you ready to deal with the dynamic hazards of wilderness?
 - If you choose to carry a hand-held electronic signaling device, be familiar with its operation, limitations, and frequency of failure to transmit. **Do not rely on it** to summon rescue personnel or notify family you are “OK”. Read the instructions for your device; keep them with you. Understand how it works and what services provided by the manufacturer must be activated and purchased. If required, register your device and provide **all** the information requested.
 - Some devices (e.g. SPOT) ask for a primary contact in the case of an emergency activation. *Do not start your trip* until that person has complete details, including:
 - Your intended route; alternate routes you might take; when and where you plan to start and end; knowledge about your experience level; and photographs and descriptions of your gear.
 - Full names and photographs of all members of your party and *their* emergency contacts.
 - **The difference between *HELP*, and *SOS/911* on a SPOT-type device:**
 - SOS/911 - for a true emergency:** immediate response (through On-Star System)
 - Help:** Not an emergency, signals your chosen contacts, and they already know what to do (E.g. hike or drive to your location, etc.)
 - I'm OK:** Signals your chosen contacts. One or two days of no signal is common and not necessarily an emergency. *Transmission in wilderness may be very inconsistent.*
- The National Park Service (NPS) will not respond to **HELP** or a missed **I'm OK** check in as an emergency unless we have additional information. If you have a true emergency, activate **SOS/911**. *Share this information with all chosen contacts.*
- How to access your tracking webpage, including login and password. Knowing your prior waypoints or tracking information may help the NPS to respond.

Responsibilities during your trip:

- Your knowledge, experience, and equipment will contribute most to your survival. Can you self-rescue or get help from other hikers? Do *not* signal **SOS/911** unless it is a true emergency, but do not be afraid to signal if you know it is justified.
- If you activate **SOS/911** and it is safe to stay where you are, *don't leave*. It may be harder for rescuers to find you if you move. Stopping the **SOS/911** signal or activating the **OK** signal may not cancel a response, so stay in the areas where you activated the **SOS/911** even if the emergency has passed.

Responsibilities after your trip or emergency

- If you activated the **SOS/911** but have not been contacted by the NPS or other agency personnel, *call us immediately* once you are out of the wilderness; we may be looking for you. Sequoia and Kings Canyon National Parks' 24-hour emergency dispatch phone number is **559-565-3195**.
- Let your contact(s) know as soon as you are out of the wilderness and not in need of help.

Your locator device is only a tool. Activate *SOS/911* only in a true emergency, and the NPS will do everything reasonable to help you.

Wilderness Etiquette

- Hikers should always yield to pack animals. Stand **downhill** from passing pack animals and other stock so as to not appear predatory.

- In general, allow uphill travelers the right of way. Unless the uphill party is looking for a reason to have a break, allow them to continue with the momentum they have to get up the hill.

When planning for and spending time in wilderness, think about the experience of others around you and try to be considerate. For example,

- Try to get to your camping area well before dark so a proper site can be found and the noises of settling in for the night are not disturbing the sleep of others.
- While walking or riding, normal human noises of conversation are a good warning for Sierra Black Bears to vacate the area, but yelling in a disruptive manner can be an unwanted disturbance to the solitude of others.
- Do not create or construct displays that disturb the natural state of the area.
- When walking or riding on-trail, walk single file in the middle of the trail even when it's wet or muddy so trails are not widened or re-routed.
- When walking or riding off-trail in a group, spread out so you do not create a new trail.
- Leave flowers and foliage undisturbed so that they can be enjoyed by other hikers and contribute to their native ecosystem.
- If you will be using a WAG BAG, do not leave it anywhere in the wilderness. It should be disposed of properly in a front-country trash receptacle.
- If you find an artifact, do not disturb or collect it. Leave the artifact where you found it so that it can be understood in context. If possible, note the GPS coordinates or specific directions to the location where you found the artifact and relay this information to a park ranger.
- If you have concerns about the actions of another wilderness traveler, tell a Park Service employee.

Remember, we are all stewards of our national parks. The positive actions you take today can leave a wonderful experience for tomorrow.

Fishing and Pets

Fishing

Fishing requires a California state fishing license for everyone aged 16 or older. Obtain a license and a copy of state fishing regulations before your trip. State fishing regulations and license information is also available online at www.dfg.ca.gov.

- A. State fishing regulations apply to all areas in Sequoia and Kings Canyon National Park except for those areas listed in section B below.
- B. Exceptions to state fishing regulations for Sequoia and Kings Canyon National Park:
 - a. In areas below 9,000 ft. in elevation and more than one-quarter (.25) of a mile from developed areas. "Developed areas," for the purposes of this regulation, are defined as areas within one-quarter (1/4) of a mile of buildings, campgrounds, picnic areas or parking lots that accommodate more than five (5) vehicles.
 - i. Rainbow Trout, Sacramento Sucker, Kern Rainbow, Sculpin, and Roach fish (i.e. native species of the park) must be released.
 - ii. Artificial flies or lures with barb-less hooks are required.
 - b. Soda Springs Creek (Sequoia NP) is closed to fishing

Pets

Pets are NOT allowed in the wilderness of Sequoia and Kings Canyon National Parks because they disturb wildlife and other visitors, even unintentionally with their simple presence.

A general rule of thumb is that pets are allowed in Sequoia and Kings Canyon National Parks anywhere that a car can go. Front-country campgrounds, picnic areas, roads, and other developed areas are the only places where pets are allowed. They are not permitted on any hiking trails.

In developed areas, pets must be kept on a leash at all times. The leash must be less than 6 ft. (1.8 meters) long. For your pet's safety, please don't leave pets in hot cars. Pets cannot be left tied and unattended at any time.

In the National Forest lands that surround Sequoia and Kings Canyon National Parks, leashed pets are allowed on trails (subject to restrictions in bighorn sheep habitat). See page 14.

Stock Use

Recreational stock use in these parks is subject to a series of controls to ensure minimal impacts. Stock users need to be familiar with all information contained in the Stock User Guide (issued annually) and additional information, which can be obtained from the Wilderness Office (559-565-3766), or found on our website at : <http://www.nps.gov/seki/planyourvisit/stockuse.htm>.

Commercial users must obtain a Commercial Use Authorization (CUA) from Sequoia and Kings Canyon National Parks, as well as any other public land areas through which a trip will be passing. For information regarding CUAs, please contact the Sequoia and Kings Canyon National Parks Concessions Office at (559) 565-3103 or e-mail SEKI_Concessions@nps.gov.

Military Over-Flights

Much of the wilderness in Sequoia and Kings Canyon National Parks underlies a special military training airspace - the R-2508 Complex. Military pilots train for combat missions in the complex, often by flying low and fast. Such flights can be very startling to people and animals. In the portion of the R-2508 Complex that is over these parks, pilots are required to fly no lower than 3,000 ft. above ground level. Occasionally pilots do fly lower than allowed. If the military's radar tapes confirm a pilot flew lower than allowed, disciplinary action is possible. If you witness an incident you feel is questionable, please report it to:

R-2508 Central Control Facility
100 Sparks Road Building
2580 Edwards Air Force Base
CA 93524

Note the date, time, location, direction of flight, and describe the aircraft in as much detail as possible. Please send a copy of your letter to Sequoia National Park.

Archaeology: Voices from the Past

Many physical clues remain in the wilderness of Sequoia and Kings Canyon National Parks of those who ventured before us: obsidian arrowheads, prehistoric pottery, pictographs, mines, graves, and cabins. If you encounter such sites or artifacts, do not disturb them. Human history is still being recorded and deciphered in the wilderness. Preserving these traces of the past allows others to view and enjoy them.

Archaeological remains are nonrenewable resources that may have been in place for thousands of years. Disturbing them removes, and in some cases, destroys the context from which to study and enjoy them. Disturbing sites and artifacts is a crime punishable by law. Do not excavate, remove, damage, alter, or deface items of archeological interest. If you find evidence of an archeological site, report it to a ranger. With your help and respect, these stories will not be lost.

You may also encounter historic structures such as the Mount Whitney Summit Hut built in 1909 for meteorological observations or the beehive-shaped John Muir Memorial Shelter on Muir Pass built in the 1930s. Unfortunately, vandalism, trash, and human waste have compromised their integrity, and camping in or near them is prohibited. Please respect their historic value and use them only if an emergency arises.

Working in the Wilderness

Wilderness & Trailhead Rangers

As snow melts from the high country in early summer, wilderness rangers prepare to return to their remote ranger stations. They will spend three to four months patrolling hundreds of miles of trails and thousands of acres of wilderness. Their typical duties include reporting on trail conditions, enforcing regulations and restrictions, picking up trash left by careless visitors, rehabilitating damaged campsites, performing minor trail maintenance, checking meadow conditions, monitoring bear activity, administering first aid, dispensing information, searching for lost hikers, and coordinating rescues. Their primary role is to ensure that your wilderness is protected and you have an enjoyable, safe experience.

Trailhead rangers perform just as important work as the wilderness rangers. Based in the front-country, these rangers issue wilderness permits, educate visitors on wilderness ethics, and perform much of the same work as wilderness rangers within a day or so walk from the trailheads.

If you encounter a ranger, please share your observations.

Books

Hiking Sequoia & Kings Canyon National Parks by Laurel Scheidt. Covers eighty-six trails that vary in difficulty from easy strolls to challenging treks.

Sequoia and Kings Canyon National Parks: Your Complete Hiking Guide by Mike White. Details trips for all levels, covering both the west and the east sides of the parks.

The High Sierra: Peaks, Passes, and Trails by R.J. Secor. Comprehensive resource covers most known routes throughout the High Sierra. Recommended to hikers wishing to hike off maintained trails.

Backpacker Magazine's Outdoor Survival: Skills to Survive and Stay Alive by Molly Absolon. Introduction to basic and intermediate skills.

Backpacker Magazine's Trailside Navigation: Map and Compass by Molly Absolon. Introduction to basic and intermediate skills.

Topographic Maps

Support the Parks:

Buy from the Sequoia Natural History Association

The Sequoia Natural History Association (SNHA) is a non-profit organization that works to support Sequoia & Kings Canyon National Parks. SNHA sells educational materials in visitor centers throughout the parks. Common trip planning guides are listed here, but be sure to visit www.sequoiahistory.org for their complete selection. Orders may also be placed by phone at (559) 565-3759.

7.5 Minute USGS Topographic Quadrangle Maps

The diagram to the right lists the names of the quadrangle maps. The grey line is the boundary of Sequoia & Kings Canyon National Parks. Major roads inside the parks are black lines on the left side of the diagram.

Parting Words

“Thousands of tired, nerve-shaken, over-civilized people are beginning to find out that going to the mountains is going home; that wildness is a necessity; that mountain parks and reservations are useful not only as fountains of timber and irrigating rivers, but as fountains of life.

-- John Muir
